TELL'S IRIS GARDENS

Phone FRanklin 3-1845 — Provo, Utah

Dear Friends:

Here it is the end of April and I hasten to write this before I leave for the Regional Meeting of Northern California and Nevada (Region 14) on May 1st. I had written a foreword some months ago and now that I am ready to get the copy ready for mailing I cannot find it. So you will forgive me for not writing a long foreword this year. It will, anyway, give you more time to study the pages of this "check list", to read Mr. Ferguson's new poem or to chuckle over the "Squiggles" which Mrs. Olmstead has drawn for us again.

We have the stock moved to our new place. The soil here is quite heavy and will grow different rhizomes than you may have received from us in the past, but we hope they will please and that they do well in your gardens. We appreciate your orders and the many kind letters of thanks. You will understand when we do not have time to answer all letters. When you have questions to ask if you will put these all on one page (and leave space for an answer) it will simplify things for us. Often we receive letters with questions scattered throughout several pages and unless notes are made at the time of reading we miss some of these. But ask again.

I try to plant all the Guest iris myself, however, in 1955 when we were making the Big move one of my men planted three and failed to write the breeder on the label. I am at a loss to know who they belong to. If the breeder recognizes these numbers will he please write to me about them? S P B 21, W.B. B 13, B V 5 A 9.

Your words of appreciation for the catalog are thoughtful and satisfying. It makes us feel good that so many of you find the catalog useful. We leave out only those pedigrees the breeders will not divulge or are unable to furnish. We have made a change in two pedigrees and you will note these for Right Royal and Pink Accent.

By the time you receive this 1957 issue the iris season in the United States, Canada and England will have passed and remain only a pleasant (we hope) memory.

Best wishes to all for a year of exciting gardening.

Sincerely,

TELL.

In Appreciation

It is with thanks and gratitude I receive the high honor of the 1956 HYBRIDIZER'S MEDAL for it is something not expected for many long years ahead (if ever). And to the President of the American Iris Society, Marion Walker, and his Board of Control and Secretaries I say: "Thank you from the bottom of my heart."

This award, surely, will be a challenge and incentive to try to do even more for advancement in hybridizing these beautiful gems.

Unable to attend the 1957 Convention in Memphis I accept the awards of Merit for

with keen appreciation. To the judges of the American Iris Society who liked them well enough to vote them this high award, I give thanks.

"SIGNS OF THE TIMES"

It used to be we'd plant our seeds,
And take a hoe to kill the weeds.
The rain would fall, the sun would shine,
And everything would turn out fine.
But now days that is not the style;
No, not by many a country mile.
You have to fumigate your soil
Or else the nematode will spoil
The roots of anything you plant.
And then there is the busy ant
With all the aphids he can spread.
You get him or your plant is dead.
The cutworm and the slimy slug,
The earwig and tomato mite,
Are just a few you have to fight.

I could go on and fill a page
Of things, it seems, have come of age.
So, let's consider fungicides!
To get the spore that comes and hides
In places that we never see,
But works as busy as a bee.
To fertilize, and do it right,
You need to study day and night.
There is a cult whose firm belief
Is that you spray it on the leaf—
Trace elements are what you need,
(If you believe in half you read.)
Organics is another fad
That seems to drive some people mad.
A lot of them are very sure
That what you need is worm manure.

Meanwhile you have to irrigate—
No rain will fall 'till way too late.

So dust and fumigate and spray.
If you are faithful, then some day,
You'll get a mess or two of greens,
Or corn, or squash, or maybe beans.

But is it really worth the price
You have to pay to have it nice?

I sometimes wonder if, in Nome,
These bugs and pests are all at home.

—By Walker Ferguson, 1150 N. Broadway, Escondido, Calif.

1957 I N T R

ANNE ADAMS (D. P. Wickersham). Midseason. 38 inches. (Mary Randall x D. Hall, strawberry-pink seedling.) According to Ridgeway's color chart Anne Adams is Tourmaline pink, which makes it a very rich, vivid pink with the tangerine beard. There is just a tiny white spot at the base of the beard. The flowers are large and beautifully shaped, as are most of the seedlings of its pod parent. Very well liked by visitors to the Wickersham and Waters garden and was awarded an H.C. 1956. Good grower and fine increaser. Net\$20.00

FIRST CURTAIN (Tell). Early. 24 inches. (Party Dress x Pink Fulfillment.) Originally registered as Curtain Call the name was changed since another iris was distributed under this name without officially having been registered. This is a true pink self, wide of parts and heavily laced. The standards are cupped and open, but showing such pretty clean, ruffled styles and central parts that most who see it forgive its unorthodox form. The falls flare nicely. Will breed lace and true pink color. No. 51-11A. Net\$20.00

FROSTED LACE (Luzon Crosby). Midseason to Late. 36 inches. ((Tell seedlings: 46-204 x 46-2 F) x (Song of Songs)) x (Pink Enchantment). Large pure white, wide, flaring, sparkling and edged with Chantilly lace. This will be great blood to use with Gracelle, Queen's Lace, Utah Cream or for whites with red beards, or Pinks. H. C. '56\$20.00

GLACIER MOHR (Luzon Crosby). Early-Midseason. 36 inches. (Purissima x Capitola.) Many good seedlings have come from this cross. This one is very fine, and proves that the possibilities of one cross are almost limitless. Full, rounded Mohr type shape of heavy substance. Subdued onco-veining shows through the lovely, cool, blue-gray coloring. Fast of increase—hence the low introductory price. Net\$15.00

BUDDY MITCHELL (Robert Norse). Early-Midseason. 30 inches. (I. hoo-giana x Lullaby.) Self of Methyl Violet, plate 39/2 Royal Horticultural Color Chart. Two branches and terminal carry 7 to 8 flowers, 5½ inches wide by 4 inches in height. Standards closed, falls flaring and have a tiny white line at tip of bright orange beard. Pollen fertile and sets seed easily. This may bring new vigor to the violets, blues and flamingo pinks, and is introduced for these purposes. Both Mrs. Mitchell and Prof. Mitchell selected this flower to be given the endearing name Sydney had for his sweet wife Rose. Net.....\$10.00

LA NEGRAFLOR (Luzon Crosby). Early-Midseason. 36 inches. (Storm King x Solid Mahogany) x (Sable Night). An unusually rich, dark black-purple self of large size and beautiful form. The petals are heavily substandard, broad with waved and ruffled edges. The darkness is intensified by the dark beard. The name is Spanish and means "The Black Flower." H.C. '56. Net.....\$25.00

LATE APRICOT (Tell). Late to Very Late. 34 inches. (Sister to First Curtain and June Meredith.) Lovely smooth apricot or peach colored iris with light ivory area in the center of the falls. The flower is tailored. This beauty will help to close the season with a quality flower. No. 51-11F. Net\$20.00

PURPLE HAVEN (Serlena Reynolds). Midseason. 36 inches. (Vatican Purple x Carpenter 67/8.) This large purple self is rich, free of any haft markings and the self beard makes it most distinct. I am pleased to be privileged to co-list this with the "Haven" gardens and to have a few to release. H.C. '53. Net....\$20.00

TOY TOWN (Tell). Early-Midseason. 14 inches. (Deep Velvet x Great Lakes). A small, flaring medium blue table iris. Fertile both ways. Net\$5.00

PRODUCTIONS

RAVEN COUNTRY (Tell). Late to Very Late. 34 inches. (Night Life) x (After Midnight x Black Forest.) Quite the most wonderful "black" iris I have bred or seen, for it has depth and richness of color and the greatest substance of any iris I know, but it is also a temperamental grower and blooms so late the very dark blooms come when the sun is most intense and, as with most dark colors, will burn. I would suggest planting this in partial shade. If it were a perfect grower I would put a bigger price on it. Difficult to pod and has no pollen. It may have an upset number of chromosomes. H.C. '54. A few at Net\$20.00

SUN FROST* (Les Peterson). Midseason to Late. 32 to 36 inches. ((William Mohr) x (Happy Days x Wabash)) x (Moontide). A wonderful addition to the yellow amoeanas. The flowers are not large but perfectly formed, perky. The standards are waxy white, the round and perfectly horizontal falls are a lovely, clean, medium yellow dimming slightly at the outer edges. The hafts are free of any veinings. Sun Frost made a hit at the 1956 Salt Lake show. Received Certificate of Commendation and H.C. both in 1956. A fine and easy grower. Net.....\$25.00

SWEET ALICE LEE (Mrs. Melvina Suiter). Early to Late. 38 inches. (Snow Flurry x Sun Lakes) x (Courtesy). Fluted white self with a blue beard. The pod parent is sister to Lady Bluebeard. This is equally fine but more tailored. A distinct personality and wonderful blood for this color combination, whites and blues. Net \$10.00

UINTAH (Luzon Crosby). Early to Late. 40 inches or more. (Swan Ballet x Mount Emmons). Large, beautifully formed white with broad full standards and ruffled and flared falls. White-tipped beard. Many buds on strong perfectly branched stalks. A gorgeous flower. Scarce. Net.\$25.00

WHITE CHALICE (Eva E. Faught). Late. (19 H x Cahokia) x (Spanish Peaks). 30 to 34 inches tall. This is a novelty and one for the arranger, or the hybridizer working for something different. I suggested the name "White Tulip" for when it is newly opened the falls stand upright, enclosing the standards and styles like a cup. As the flower ages both the standards and falls spread open, resembling a Japanese Iris. White with slight greenish cast. Heavy substance and grand finish. It should be a good parent for conventional forms in both blues and whites. Has no stamens. Net\$10.00

Special Listing

PURE SUE* (Samuelson '56). Midseason. 40 inches. (Purissima x El Capitan) x (Susiana x Parisiana). Stately large white borne on heavy stalks. This flower made a grand showing at the Spokane show. Bred to fertile Onco-blooded hybrids should produce some wonderful seedlings. Stock scarce. May prove tender in some areas, although it grows quite well here where our winters go to 20 below zero on occasion. Increase is not fast, but adequate. Net. . \$5.00

The color is luscious — but this isn't it.

- ANYTIME*** (Cavagnaro '56). M.-L. 38 in. (Alba Superba x Lady Mohr.) This is absolute perfection. Very round, wide, perfectly horizontal falls, huge globular standards all of superb, heavy substance. Off-white because of the Chartreuse lines at the hafts. Some purists might object to these, but to those who know quality the marvelously perfect bloom overcomes the slightly "dirty" appearance of the falls upon close inspection. Pollen somewhat fertile and will pod. It should hold great promise as a breeder when used to other fertile *Oncocyclus* hybrids, or to use with things that need width of parts. H.C. '54, H.M. '56. SPURIA IRIS

WADI ZEM ZEM

Spurias belong to the beardless species. Their hard, strong, rhizomes are ideal for holding banks. They bloom after the tall bearded season has closed. Their orchid-like flowers are splendid for corsages or for bouquet work and arrangements. Here is an open field for hybridizers who desire to work with this species. Their disease resistance make them the easiest iris to cultivate.

(Spurias will be shipped after Sept. 1st—**Order these on a separate sheet.**)

If suprias become affected with disease (or rot, which rarely occurs) Carco X (a coal-tar product quite similar to creosote or stock dip) used according to directions sprayed over the leaves and rhizomes of spurias will clear up the trouble, or in stubborn cases it might be wise to lift, wash and dip all rhizomes in the solution. It is wise to wash all new (incoming) rhizomes in this solution before they are planted to insure good health. (Creolin, Creosote, or Lysol solutions may be used in place of Carco X if it is not available.)

HEMEROCALLIS

(Daylilies)

This popular perennial is gaining friends by leaps and bounds. It blooms from late spring through the heat of summer and many kinds re-bloom until frost. "Hems," as they are called, give bloom when there is little else in flower during the heat of summer. They grow into compact clumps and are very disease resistant, and once established withstand lack of moisture quite as well as the bearded iris.

These may be ordered with either Bearded Iris, Dwarfs or the Spurias, and if possible they will be shipped at the same time—if not (due to the stock) will be shipped in September when more mature.

TERMS OF SALE

DISCOUNTS and extras. To show our appreciation for your orders we offer the following discounts: Orders over \$25.00 select 1/4th more in free iris from the catalog. Orders over \$50.00 select 1/3rd more in free iris. Then list a few you would like to grow and from this list we can select EXTRAS, for we like to be generous. It might be wise, also, to list a few alternates in event some variety may be sold out. Let us know if you do not want substitution, however, and in that event we will refund. If you wish to include postage (7c per rhizome) select double the amount in plants of your choice.

We are proud of our reputation for generosity. We do not make sensational discounts and collection offers. This all takes time and space in the catalog. We would rather have you list the varieties you do not have and might enjoy from which we can choose the extras for your order.

SHIPPING DATES. We ship from first of July to end of September, although if weather permits, and we are able to dig, later shipments may be made. However, unless you live in a climate suitable to late planting this is not advisable unless you are prepared to give adequate winter mulch.

Please do not write instructions or personal letters on the order sheet. Be sure your order is all on one page or if, of necessity, you must make the order on more than one page clip these together and have your address plainly written on each order.

CASH WITH ORDERS, PLEASE, UNLESS YOU HAVE AN ACCOUNT WITH US. POSTAGE RATES HAVE RAISED AND WE ARE OBLIGED TO ASK 50c ON ALL ORDERS UNDER \$10.00.

We do not have a Wholesale list. However, commercial growers who hold licenses may send their list of wants for a quotation.

GUARANTEE. We guarantee all varieties to be true to label and to be normal rhizomes for the variety. We also guarantee live delivery and satisfaction. Please notify us at once of any discrepancy in your orders, or if you are not completely satisfied. We will replace any variety lost over the winter if such loss is listed together with a new order. In event we have discontinued the variety you may select the value in something we do list.
